

DISASTER SUPPLY READINESS

Are you prepared for the unexpected? A cost-effective solution to weather the storm.

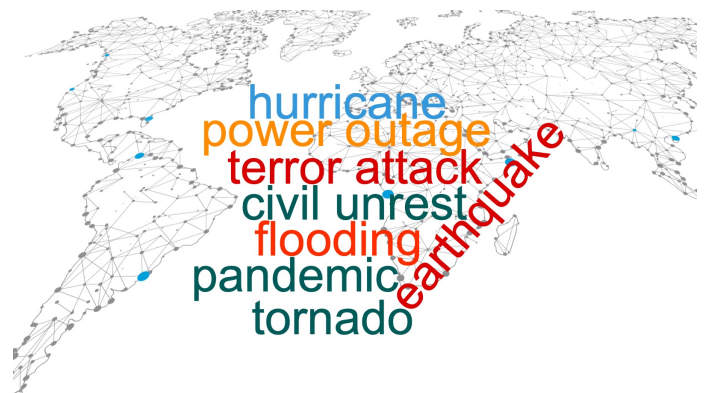

WHAT YOU NEED. WHEN YOU NEED IT.

The SocoSIX Disaster Supply Readiness program prepositions and maintains important supplies necessary to support your business anywhere in the world.

Starting with an initial assessment, we help you determine what, where and how much is needed for adequate disaster response. We store your supplies, maintain and deploy them at the time of need so you don't pay a premium for hard to get resources in the middle of a crisis. You are always in control of how your supplies are utilized and at any time, you can sell or donate to anyone who is in need.
